Ermator T8600 Three-Phase HEPA Dust Extractor with Distribution Box

The T8600 (480V) Three-Phase Dust Extractor is equipped with a quiet, yet powerful turbine motor delivering exceptional airflow at 353 CFM. Its two oversized, tested and certified HEPA filters ensure clean air exhaust. The T8600 includes the same sock-style pre-filters that have earned a reputation for providing nonstop grinding and a long service life. The pre-filters can be cleaned from outside of the tank via Jet Pulse negative air pressure. The unique 70 foot Longopac allows fast drop-down, dust-free disposal into individually sealed plastic bags.

When used with the C5500 Pre-Separator, the T8600 is the most recognized and proven HEPA Dust Extractor/Pre-Separator three-stage filtration system in the world. The T8600 is packed with plenty of power and filter area. It exceeds the requirements of the most demanding three-head grinders.

Model #	07213
CFM	353
